Step one
Locating and screwing the trap in the tunnel:
- Use size 6 x 25mm rust proof screws
- Traps should be fixed with the treadle 5mm (approximately) from the side of the box and the baffle.
- Baffles are optional for the DOC 150’s only.

Step two
Setting the trap:
- Pull carefully on the wire setting loop with your hand. Continue past the top of the trigger arm, allowing the trigger arm to drop onto the treadle.
- Slowly release pressure, allowing the bottom of the trigger arm to gently ride up treadle and catch on the sear.

These Department of Conservation ‘current best practice’ tunnel designs must be used with DOC 150 traps. These tunnels are designed to exclude non target species, guide target species and provide public safety.

**Single set tunnel design.**
In areas where weka are present, the tunnel length is 525mm, the distance from end mesh to the internal mesh increases from 130mm to 255mm.

**Materials**
- All timber H4 treated radiata or similar.
- Ends and baffles 20mm galvanised weld mesh.
- 160mm galvanised decking nails.

All traps must have hazard warning on lid.

Lid and base 400 x 200 x 25mm

Lid pivots on 60mm decking nail

Ends and baffle 20mm weld mesh

Sides 400 x 150 x 25mm

Lid labelled with project information

Lid secured by 40mm screw or coach screw.

Saw grooves

Spacer 150 x 40 x 25mm

Internal baffle hole 3 x 4 meshes, aligned just off the centre of the treadle—see setting diagram

60mm decking nails

External end hole 3x3 meshes

Drawings, Phil Waddington
These Department of Conservation ‘current best practice’ tunnel designs must be used with DOC 150 traps. These tunnels are designed to exclude non target species, guide target species and provide public safety.

**Double set tunnel design.**

In areas where weka are present, the tunnel length is 950mm, the distance from the end mesh to the internal mesh increases from 130mm to 255mm.

**Materials**

- All timber H4 treated radiata or similar.
- Ends and baffles 20mm galvanised weld mesh.
- 160mm galvanised decking nails.

All traps must have hazard warning on lid.

Lid secured by 40mm screw or coach screw.
